Upcoming Adult Programs June 2017 - November 2017

June

Saturday June 10, 2:00 pm - 4 :00 pm

Drawing in charcoal and pencil with Ray Olsen

Drawing in Pencil and Charcoal. Students will learn to draw still life objects using pencil and charcoal on News Print Paper.

Learning to work on large 18x24 inch pads will help the student gain the confidence to eventually draw anything large or small. Learning to draw is learning to "see" and visually breaking down objects into their basic shapes will help students see in line.

Olsen graduated from Parsons School of Design in New York City with a Bachelor of Fine Arts Degree. He also studied at the Art Students League and the School of Visual Arts. He is an art director and designer, a fine artist and professional photographer. All supplies provided. Limited to 10 participants.

Saturday June 10, 10:00 am - 5:00 pm
World Wide Knit in Public Day

Drop in anytime through out the day and bring a project you are working on, pick up a pattern for charity knitting or just pick up a needle and some yarn, that will be provided and see what this craze is all about.

June/July/August

Summer Reading for Kids, Teens and Adults

Build a better world!

September

Saturday September 2, 2:00 pm

Homemade Body Scrubs Workshop with Ehris Urban of Grounded Holistic Wellness

This program is presented by an herbalist daughter/historian mother duo who believe that the art of healing comes from nature not a physician and that the best pharmacy is within yourself. Each participant will create and take home both a Lemon Sugar and Cinnamon Coffee scrub, all materials included. Limited to 25 participants.

Monday September 25, 7:00 pm

Waxing and Waning a Memoir of an Amateur Astronomer by James Hannon

Mr. Hannon is a long time amateur astronomer and author who will be sharing his vast knowledge of the night sky. After his talk, Mr. Hannon and friends will be leading a field trip across the street to the Prospect St. School parking lot where telescopes will be set up for viewing the night sky.

October

Saturday October 14, 2:00 pm

It really happened in Connecticut

Witchcraft trials, a serial murderer who inspired a popular movie, and a bizarre vagabond who has fascinated people for 150 years are three amazing yet true stories from the state's past that independent historian Diana Ross McCain will recount in her talk "It Really Happened in Connecticut"

McCain draws the tales from her books It Happened in Connecticut: Twenty-five Events that Shaped the Nutmeg State and Mysteries and Legends of New England: True Stories of the Unsolved and Unexplained.

Diana Ross McCain is a partner in Come Home to Connecticut, an enterprise that offers historical and genealogical research services and programming. She has been researching, writing, and speaking about history for more than thirty years.

McCain holds bachelor's and master's degrees in history, and was on the staff of the Connecticut Historical Society for more than twenty-five years.

November

Tuesday November 14, 6:30

Eagles in Connecticut: Return of an Icon

Bald eagles were once in such dire trouble that people discussed what should replace them as America's national symbol. The ongoing story of their recovery as a species in Connecticut will be the subject of a talk by wildlife biologist, Brian Hess. With accompanying projected images, Mr. Hess will explain eagle biology and the story of their perilous population decline and subsequent recovery, as well as what is being done to conserve their populations for future generations.

Brian Hess is a wildlife biologist with the Connecticut Department of Energy and Environmental Protection. Mr. Hess studied wildlife conservation as an undergraduate at the University of Delaware and received his M.S. from the University of Wisconsin - Milwaukee. He has worked with California condors, greater prairie-chickens, mottled ducks, and shorebirds before starting with DEEP in 2014. The Wildlife Division's Wildlife Diversity Program conserves non-game wildlife. As part of that group, Brian works to monitor and conserve large raptors, reptiles, and amphibians.
