Mobile WiFi Hotspot

Quick Start Instructions

A Mobile WiFi Hotspot allows you to wirelessly connect your mobile device/laptop/computer to the internet.

1.) **Make sure the hotspot is fully charged.** Plug the USB-C power adapter that came with your Hotspot into the charging port, as shown here, then plug the A/C adapter into an electrical outlet.

The Battery indicator will glow, indicating approximate battery life remaining.
3 LEDs light up blue: Battery level 80% - 100%
2 LEDs light up blue: Battery level 40% - 79%
1 LED lights up blue: Battery level 15% - 39%
1 LED lights up red: Battery level 1% - 14%

LEDs will flash while charging. Once the battery level is at 100%, 3 LEDs will display solid blue.

After charging, unplug the AC adapter from the outlet and unplug the adapter from the hotspot. Return the AC adapter to the hotspot kit.

2.) **Turn on the hotspot.** Press and hold the Power key for 3 seconds. It will activate automatically, but it may take a few minutes for the hotspot to connect to the T-Mobile cellular network. The Signal indicator will show your connection and signal strength.

Good coverage: 3 LEDs all light up   Flashing blue: Network disconnected
Middle coverage: 2 LEDs light up   Solid red: No network, limited or no service.
Weak coverage: 1 LED lights up

3.) **Connect!** On your computer or mobile device, go to the WiFi/network connection settings and select **alcatelWiFi TvillePL.** When prompted, enter the password: **everybodylearns**. You are now connected to the internet!

4.) **Turn off the hotspot.** When the hotspot is not in use, press and hold the Power key for 3 seconds. All LEDs will glow blue before the unit powers off.

Return the hotspot kit, including the hotspot, USB-C charging cable, wall adapter, and zipper case, to the Terryville Public Library by the due date.
